7	Cared Payment Details Validation Test	<div></div>	<div>Have to fix following errors in Carddetails.jsp page.</div> <ul style="list-style-type: none"><li>• Without filling the fields in the form, it will redirect to the next page. So, fix it to after filling all fields and redirect.</li><li>• Card Holder's ID should be a number. Fix it only to enter numbers not text.</li><li>• Card Holder's Name should be text. Fix it only to enter text not numbers.</li><li>• When entering pin number, it is</li></ul>

visible. Fix it as password type.

- Pin number's length should be greater than 3.
- Card Number should be a number and length should be greater than 12 and less than 16. Fix it only to enter numbers not text and length to greater than 12 and less than 16.

(After fixing errors)

The screenshot shows a web browser window with the address bar displaying 'localhost:8080/ClothingStoreBackup-UI/UX/carddetails.jsp'. The page title is 'Payment Details'. The form contains the following fields:

- Card Holder's ID: 123
- Card Holder's Name: Wanthi
- Card Number: 1234567893445566
- Exp Date: December 2020
- Pin: (empty)

A validation error message is displayed at the bottom of the form: 'Please lengthen this text to 3 characters or more (you are currently using 2 characters).' Below the message is a 'PROCEED' button.

Success
